

VISION

About us DM HERMES

"Now, we are proud to offer a wide range of collaboration options for private label brands"

We are always striving for perfection. Through investments, capacity expansion, and a commitment to quality and development, we aim to provide diverse production options for private labels world-wide.

The history of our company goes back to 1992. Over the past 30 years our smallfamily trading company has grown into a medium size business. In 2014, we introduced the Bombus brand to the Czech market, offering healthy, natural and tasty fruit bars. Currently we are the leading manufacturer in the Czech market and distribute the Bombus products to over 40 countries.

As a significant producer we entered new product categories such as protein bars, oat porridge, peanut butter or fruit gummies. In 2022 we opened a new modern manufacturing plant, with a production capacity exceeding 100 million units per year. Our facility features temperature controlled automatic storage with a warehouse capacity of over 4,000 pallet spaces.

A line of very tasty still healthy protein bars. These multi-layer chocolate bars are characterized by a high content of milk protein and quality milk chocolate. No sugar, palm oil or gluten are added, they contain high portion of fibre.

We believe that exceptional taste begins with the best ingredients. Our products are gluten-free and made with a minimal number of ingredients, ensuring the highest quality. We closely monitor all input ingredients and final products, continually investing in modernizing our production processes. Our quality and development department guarantees unique processes and recipes tailored to your specific requirements.

We hold the IFS High-level Certification and we are capable of producing organic (BIO) products.

Furthermore, we prioritize social responsibility and sustainability. As we expand our company, we remain committed to considering the social and environmental aspects of sustainable development goals.
